ID	Description
BP01	component adhesion / independently named software display copy
BP02	intracellular signaling / independently named software display copy
BP03	response to external stimulus / independently named software display copy
BP04	matrix organization / independently named software display copy
BP05	cellular transport / independently named software display copy
BP06	regulation of growth / independently named software display copy
BP01 · display 2	component adhesion / independently named software display copy
BP02 · display 2	intracellular signaling / independently named software display copy
BP03 · display 2	response to external stimulus / independently named software display copy
BP04 · display 2	matrix organization / independently named software display copy
BP05 · display 2	cellular transport / independently named software display copy
BP06 · display 2	regulation of growth / independently named software display copy
BP01 · display 3	component adhesion / independently named software display copy
BP02 · display 3	intracellular signaling / independently named software display copy
BP03 · display 3	response to external stimulus / independently named software display copy
BP04 · display 3	matrix organization / independently named software display copy
BP05 · display 3	cellular transport / independently named software display copy
BP06 · display 3	regulation of growth / independently named software display copy
